SUMMARY:

Full-stack developer skilled in front-end and back-end technologies, including Node.js, React.js, and MongoDB, with a focus on dynamic, SEO-friendly web applications.

TECHNICAL SKILLS:

- **Frontend -** JavaScript , React js , Next js14 , TypeScript
- **Backend -** Node.js , Express.js, TypeScript
- **Database -** MongoDB , mySql
- **Mobile**
- **More -** GitHub,C++(Basic),PostMan.

PROJECTS:

[LINK] BuyUp - Ecommerce-Store (front-end and backend development)
Tech Stack : Node Js , Express Js , React Js , Next Js , Bootstrap , MongoDB , Axios
- Use Node.js and Express.js to handle server-side logic, manage API routes, create RESTful services.
- React.js and Bootstrap for building interactive and responsive UIs.
- Manage and store data using MongoDB, providing a flexible NoSQL solution for dynamic data handling.
- Axios for making HTTP requests to interact with backend services, handle asynchronous data operations.
- Product category, add to cart functionality, authentication,Integrating payment Method and dashboard .

[LINK] MySchool - High School official website 🏠 (Front-end and backend development)
Tech Stack : Node Js , Express Js , React Js , Next Js , Bootstrap , MongoDB , Axios
- Server Power : Node.js and Express.js drive backend operations and API endpoints.
- UI Craftsmanship : React.js and Bootstrap design dynamic, responsive, and engaging interfaces.
- Request Maestro : Axios orchestrates HTTP requests and handles asynchronous data smoothly.
- Data Hub : MongoDB provides adaptable, scalable storage solutions for diverse data.
- Feature : Hard authentication (different interface for user,admin,teachers,students), create,delete,update,read (students,teacher, notice Board) , send Report card of every student and alot more.

[LINK] SendMe- Message App (Front-end and backend development)
Tech Stack : Next Js, tailwindCss, Zod, nextAuth, resendEmail ,MongoDB ,shadcn, react hook form ,TypeScript
- Server Dynamics: Next.js for server-side rendering and routing with Tailwind CSS and typeScript
- UI Design: Shadcn for customizable components, enhanced by Tailwind CSS.
- Form Handling: React Hook Form for efficient forms, validated by Zod.
- User Authentication: NextAuth for secure authentication and ResendEmail for verification.
- Data Storage: MongoDB for flexible, scalable data storage and management.
- AI Integration: Integrate AI for intelligent features and enhanced user experiences.
- Feature : Users sign up or log in with NextAuth, and manage messaging permissions via a central dashboard. Admins control message sending, ensuring anonymity, while AI-powered features enhance the user experience.

Experience:

[LINK] Freelance [FullStack developer] || School Website Project | (April) – (2024)
Tech Stack : Node Js , Express Js , React Js , Next Js , Bootstrap , MongoDB , Axios
- Built a school website with Node.js, Express.js, React.js, and Bootstrap, including role-based authentication and CRUD functionality. Utilized MongoDB for data storage and Axios for handling API requests.
- Enhanced user experience with responsive design and intuitive navigation, resulting in 100% client satisfaction.

Education:.

Bachelor of Science in Computer Science:
Government College University Faisalabad (GCUF) | Expected Graduation: 2027.
